Margrethe

Margrethe is woven from recycled wool. It can be leftover materials from clothing manufacturing or other wool products that have been recycled. Each kilogram of pure new wool produces 9 kg of carbon dioxide. Processing 1 kilogram of recycled wool generates only 0.5 kg of carbon dioxide. Positive environmental impact thanks to less water consumption, energy and lower CO_2 impact.

The wool is not dyed with water. By combining yarn from recycled clothing in different colors the textiles get their shades
